JavaScript Challenges:

1. Calculate the sum of odd numbers greater than 10 and less than 30.

2. Calculate the average of the numbers in an array of numbers.

3. Create a function that receives an array of numbers and returns an array containing only the positive numbers.

4. Rotate an array to the left 1 position.

5. Reverse an array.

6. Reverse a string.

7. Create a function that will receive two arrays and will return an array with elements that are in the first array but not in the second.
